Adobe LiveCycle Designer 8 Essentials: Formatting Objects and Using the Library

Speed your form creation process by creating components you can use over and over again.

Designer 8 ships with a standard set of form and graphic objects, which likely need to be customized for your specific needs.

Enhance your Designer skills by learning fast and powerful techniques for creating new objects, updating existing ones to meet your organization's design standards, and setting up a workflow to speed your form creation and revision process.

Stop struggling. Take this hour-long, live, online class and shave days off your production time.

- For beginning to intermediate form designers.
- Covers LiveCycle Designer, not Adobe Acrobat Professional forms.
- Uses the Adobe Acrobat Connect real-time conferencing software inside Adobe Reader/Acrobat 8.
- Pricing is per connection, not per student. One connection means one internet and one telephone hookup with the instructor. An organization may share a connection in a meeting room.

Eliminate travel costs and only pay for the training you need with live, online training with PDF Conference Producer and Adobe Certified Expert Carl Young.

Train at your desktop, or share the web connection with others in your organization in a conference room at no extra charge.

Pricing:

- \$75 per connection per class, or
- \$200 per connection for three or more classes (\$25 savings)

Course Outline on Page 2

- Priced per connection
- Train at your desk
- Share a connection in a conference room at no extra charge
- Workbook and sample files
- High-quality, two-way voice delivered via a telephone conference call
